

## COLLEGE OF COMPUTING, INTEGRATED ENGINEERING & TECHNOLOGY

**Professors Boyd Fife, Matt Edwards, and Richard Cozzens** took a group of SUU students to Mexico over Christmas break to help make a big difference in the life of a family deeply entrenched in poverty. Building a home inside of a single week isn't an easy task, but with a lot of planning, volunteers, and hard work, the Construction Management sponsored program at SUU does just that. The annual pilgrimage of students and faculty from SUU not only changes the lives of those who are receiving assistance, but profoundly effects the volunteers as well.
